

6516209429.txt

i drive 65 miles one way to work and i listen to the xm traffic and weather report every morning and on the way home. the local stations only do traffic every ten minutes if that. and lots of talk etc i really do not want. i respectfully request that the FCC reject the NAB petition 04-160. I deserve the right to listen to what i want to listen to.

I thoroughly enjoy listening to the 40's channel with my parents. no other station on public radio can offer that experience. and i listen to the CNN and weather channel on my drive to and from work. please reject the plan to restrict the choices i would have.

thank you. Nadene Engel Oliva
